

# Managing Workspaces

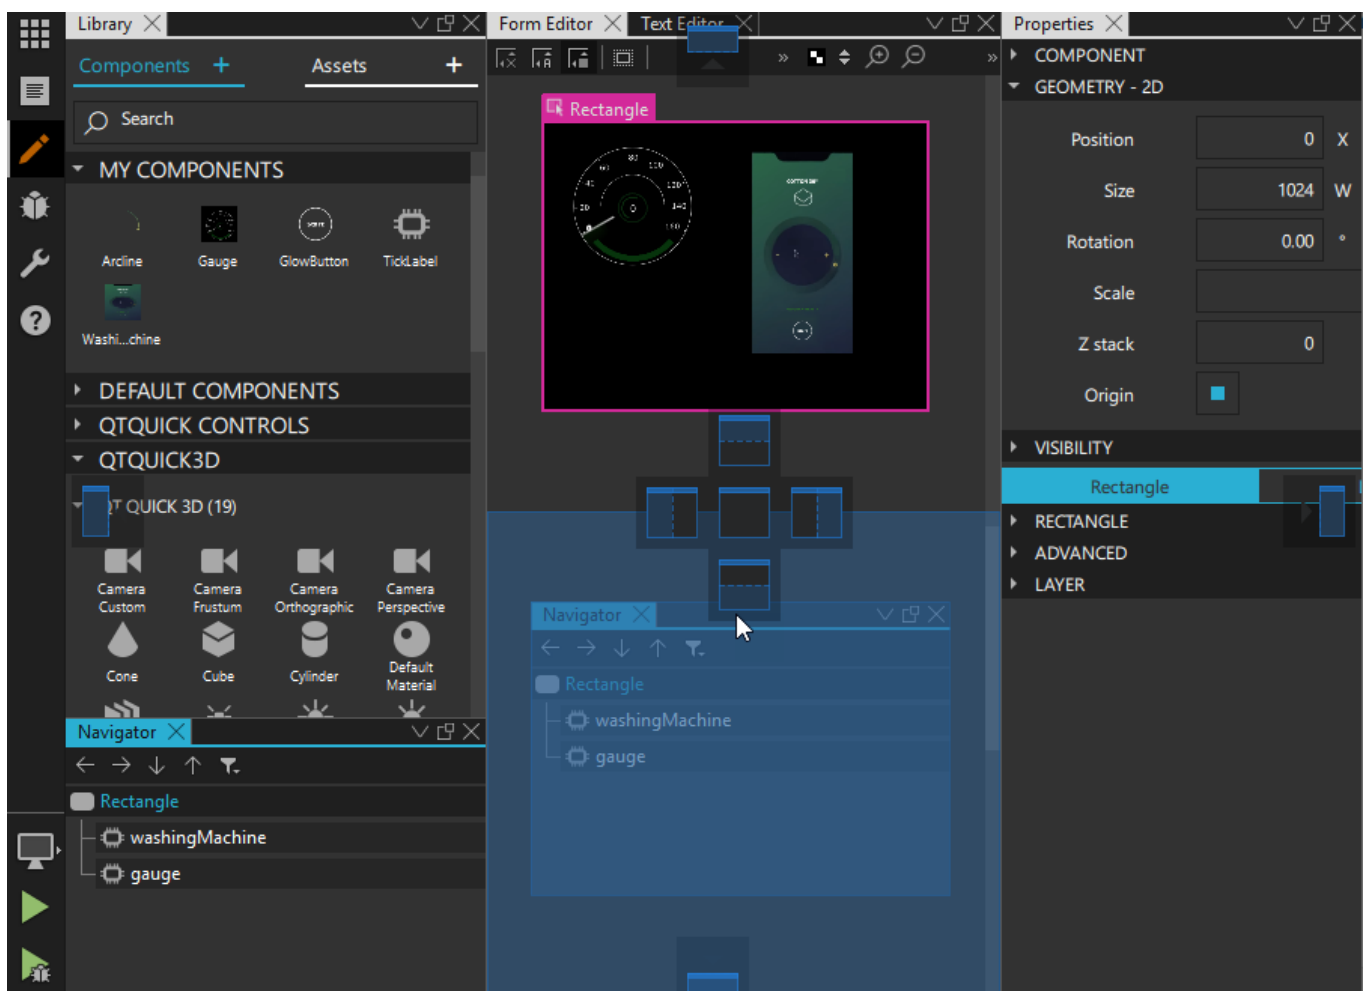

In the **Design** mode, you can arrange a set of Qt Design Studio views as a *workspace* on the screen.

To detach views:

- › Double-click the title bar of the view.
- › Start dragging the view to another position.
- › Select the  (**Detach Group**) button.

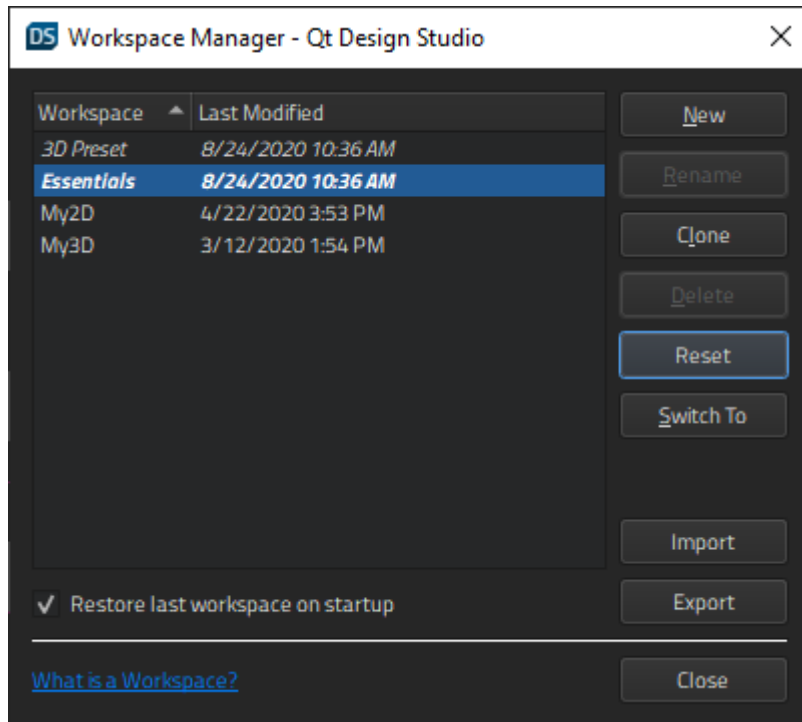

You can move detached views or groups of views anywhere on the screen.

To attach views, drag them over the dock area markers until the dock area where you want to attach the view is highlighted, and then drop them into the dock area.

## Saving Workspaces

The changes you make to a workspace are saved when you exit Qt Design Studio. Select **View > Workspaces > Manage > Restore last workspace on startup** to restore the current workspace the next time you start Qt Design Studio.

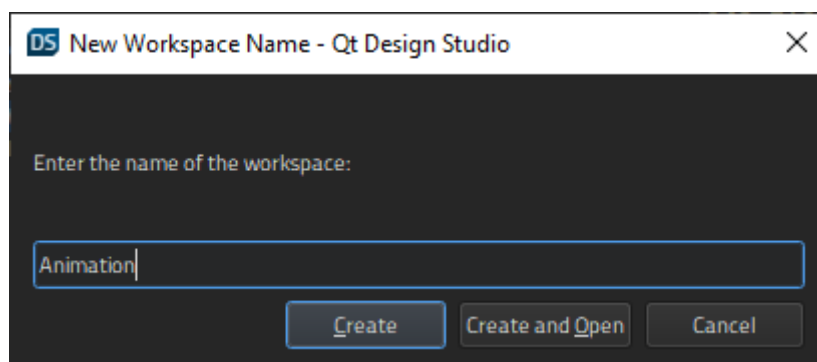

To save a workspace under a new name, select **Clone**.

To revert the changes you made to a preset workspace, select **Reset**.

To switch between workspaces, select **Switch To**.

To save a workspace after you've moved views around or opened and closed them:

1. Select **New**.

2. In the **Enter the name of the workspace** field, enter a name for the workspace.

3. Select **Create** to create a new empty workspace or **Create and Open** to create a workspace and to switch to it.

To delete the selected workspace, select **Delete** in **Workspace Manager**.
