Qt Design Studio Manual 3.8.0

Topics >

Qt Design Studio Manual > Configuring the Editor

Configuring the Editor

You can configure the text editor to suit your specific needs by selecting **Edit** > **Preferences** > **Text Editor**.

The settings you specify apply globally to all projects.

To specify editor behavior for an open project, select **Projects** > **Editor**.

Qt DOCUMENTATION

You can also specify indentation settings separately for C++ and QML files either globally or for the open project. For more information, see Indenting Text or Code.

You can perform the following configuration actions:

› Set the font preferences and apply color schemes for syntax highlighting in **Font & Colors**.

› Specify definition files for syntax highlighting for other types of files than C++ or QML in **Generic Highlighter**.

› Set tabs, indentation, the handling of whitespace, and mouse operations in **Behavior**.

› Set various display properties, such as highlighting and folding blocks or text wrapping in **Display**.

› Add, modify, and remove code snippets in **Snippets**.

› Configure code completion in **Completion**.
